Department of Health and Human Services (HHS)
National Institutes of Health (NIH)
National Cancer Institute (NCI)
Division of Cancer Treatment & Diagnosis (DCTD)
Developmental Therapeutics Program (DTP)
Toxicology and Pharmacology Branch (TPB)

Position:

The NCI is seeking a candidate with a Bachelors, Masters, and/or Doctoral degree in the field of toxicology, or an appropriate discipline of the biological, medical, or veterinary sciences that includes at least 30 semester hours in chemistry, biochemistry, or physiology, and 12 semester hours in toxicology. The candidate will be responsible for designing segments of toxicology projects and/or studies to support the development of new drugs or biologics; coordinating and evaluating tasks associated with toxicology studies; presenting scientific findings to internal and external stakeholders; and serving as a technical consultant in the area of toxicology.

Qualifications:

Applicants must be U.S. citizens. Grade and salary are dependent upon experience. Knowledge of the principles, theories, and methods of toxicology research activities as relates to new drug development is required.

How to Apply:

Interested candidates should send a letter of application, curriculum vitae, and full contact information for three references to: Elizabeth R. Glaze, Ph.D., D.A.B.T., Chief, TPB, DTP, DCTD, at: glazee@mail.nih.gov .

The NIH and NCI are dedicated to building a diverse community in its training and employment programs and encourages the application and nomination of qualified women, minorities, and individuals with disabilities.

HHS, NIH and NCI are Equal Opportunity Employers
